- Leadership and Problem Solving

SUMMARY

Passionate Frontend Developer with hands-on experience in HTML5, CSS3, JavaScript, Kotlin, Responsive Web Design, and React.js. Skilled in building responsive and user-friendly web applications with a strong focus on UI/UX, performance optimization, and clean code practices. Familiar with browser debugging tools, Git/GitHub, Data Structures, Java, Firebase, and modern frontend development workflows. Seeking opportunities to contribute and grow as a Frontend Engineer.

SAMPLE PROJECTS

👉 **Biofloc IoT System**

Smart Biofloc IoT Monitoring System

- Developed an IoT-based system to monitor water quality parameters in biofloc fish farming. Integrated sensors to measure pH, turbidity, temperature, TDS, and gas levels.
- Used ESP8266 and Arduino for real-time data collection and transmission to cloud (Firebase).
- Built an Android application for live monitoring, real time data analytics, and alerts.

Technologies: Firebase, Arduino IDE, ESP8266, IoT, Kotlin, IoT

👉 **Blood Bridge**

Blood Bridge (Web Application for Blood Donation)

- Developed a web-based platform to connect blood donors with recipients in real-time.
- Designed features for donor registration, blood group filtering, and contact access.
- Focused on creating a clean and accessible UI to simplify emergency usage. Implemented responsive design for mobile and desktop users.

Technologies: HTML, CSS, JavaScript, Responsive Design, Firebase

👉 **College Website**

College Website (Frontend Web Development Project)

- Developed a responsive college website using HTML, CSS, and JavaScript to showcase departments, courses, events, and announcements.
- Designed an intuitive and user-friendly UI/UX with structured navigation and interactive features.
- Ensured cross-device compatibility and optimized website performance for a seamless user experience.

Technologies: HTML5, CSS3, JavaScript, CSS Grid, Flexbox
